Appendix A: Root Operations Definitions

0 - Medical and Surgical		
Value	Root Operation	Definition/Explanation
0	Alteration	Definition: Modifying the anatomic structure of a body part without affecting the function of the body part Explanation: Principal purpose is to improve appearance Includes/Examples: Face lift, breast augmentation
1	Bypass	Definition: Altering the route of passage of the contents of a tubular body part Explanation: Rerouting contents of a body part to a downstream area of the normal route, to a similar route and body part, or to an abnormal route and dissimilar body part. Includes one or more anastomoses, with or without the use of a device. Includes/Examples: Coronary artery bypass, colostomy formation
2	Change	Definition: Taking out or off a device from a body part and putting back an identical or similar device in or on the same body part without cutting or puncturing the skin or a mucous membrane Explanation: All CHANGE procedures are coded using the approach EXTERNAL Includes/Examples: Urinary catheter change, gastrostomy tube change
3	Control	Definition: Stopping, or attempting to stop, postprocedural or other acute bleeding Includes/Examples: Control of post-prostatectomy hemorrhage, control of intracranial subdural hemorrhage, control of bleeding duodenal ulcer, control of retroperitoneal hemorrhage
4	Creation	Definition: Putting in or on biological or synthetic material to form a new body part that to the extent possible replicates the anatomic structure or function of an absent body part Explanation: Used for gender reassignment surgery and corrective procedures in individuals with congenital anomalies Includes/Examples: Creation of vagina in a male, creation of right and left atrioventricular valve from common atrioventricular valve
5	Destruction	Definition: Physical eradication of all or a portion of a body part by the direct use of energy, force, or a destructive agent Explanation: None of the body part is physically taken out Includes/Examples: Fulguration of rectal polyp, cautery of skin lesion
6	Detachment	Definition: Cutting off all or a portion of the upper or lower extremities Explanation: The body part value is the site of the detachment, with a qualifier if applicable to further specify the level where the extremity was detached Includes/Examples: Below knee amputation, disarticulation of shoulder
7	Dilation	Definition: Expanding an orifice or the lumen of a tubular body part Explanation: The orifice can be a natural orifice or an artificially created orifice. Accomplished by stretching a tubular body part using intraluminal pressure or by cutting part of the orifice or wall of the tubular body part Includes/Examples: Percutaneous transluminal angioplasty, internal urethrotomy
8	Division	Definition: Cutting into a body part, without draining fluids and/or gases from the body part, in order to separate or transect a body part Explanation: All or a portion of the body part is separated into two or more portions Includes/Examples: Spinal cordotomy, osteotomy
9	Drainage	Definition: Taking or letting out fluids and/or gases from a body part Explanation: The qualifier DIAGNOSTIC is used to identify drainage procedures that are biopsies Includes/Examples: Thoracentesis, incision and drainage
B	Excision	Definition: Cutting out or off, without replacement, a portion of a body part Explanation: The qualifier DIAGNOSTIC is used to identify excision procedures that are biopsies Includes/Examples: Partial nephrectomy, liver biopsy

Appendix G: Combination Clusters

Due to the nature of a specific procedure, the first code in the cluster needs to be reported with one or more of the additional codes listed for all codes to be considered valid. The example below is for insertion of a cardiac defibrillator lead into the right ventricle (highlighted code). The additional procedure describes the exact location of where the lead is inserted, which is required for correct reporting:

02HK0KZ

and 0JH609Z

You would need to review the first procedure in the combination/cluster to determine whether you need to report the additional code.

The CMS site also provides additional information on combinations/clusters.
