Introduction

This Healthcare Common Procedure Coding System (HCPCS) Level II code book goes beyond the basics to help you to code accurately and efficiently. In addition to including a customized Alphabetic Index and Tabular List for services, supplies, durable medical equipment, and drugs which the Centers for Medicare and Medicaid Services (CMS) developed, we include the following features:

Features

We've crafted a select set of bonus features based on requests from coders in the field as well as the recommendations of our core group of veteran coding educators. Features that you'll benefit from page after page include:

- HCPCS Level II Coding Procedures guide from CMS to help you to better understand HCPCS Level II codes
- Comprehensive list of new/revised/deleted codes for 2025
- CPT® crosswalk codes for select HCPCS Level II G codes
- Deleted codes crosswalk for 2025
- 60 stick-on tabs to mark specific sections of the book
- Symbols showing which codes have restrictions based on age or sex of the patient
- Medicare coverage and reimbursement alerts
- APC status indicators and ASC payment indicators
- HCPCS Level II modifiers with lay descriptions and coding tips
- Updated and enhanced illustrations of body systems at the front of the book so you don't have to search the code book for these large color images of body systems
- Highlighted coding instructional and informational notes help you recognize important code usage guidance for specific sections
- Intuitive color-coded symbols and alerts identify new and revised codes and critical coding and reimbursement issues quickly
- Symbols in Index showing each new code
- A user-friendly page design, including dictionary-style headers, color bleed tabs, and legend keys

Additionally, our dedicated team drew on their years of experience using code books to develop this book's user friendly symbols, highlighting, color coding, and tabs, all designed to help you find the information you need quickly.

Let Us Know What You Think

Our goal for this code book is to support those involved in the business side of healthcare, helping them to do their jobs and do them well. We'd appreciate your feedback, including your suggestions for what you'll need in a HCPCS Level II resource, so we can be sure our code books serve your needs.

HCPCS Level II Coding Procedures

HEALTHCARE COMMON PROCEDURE CODING SYSTEM (HCPCS) LEVEL II CODING PROCEDURES

This information provides a description of the procedures the Centers for Medicare & Medicaid Services (CMS) follows in processing HCPCS Level II applications and making coding decisions.

FOR FURTHER INFORMATION CONTACT:

Please submit an inquiry to the HCPCS mailbox at HCPCS@cms.hhs.gov.

A. HCPCS BACKGROUND INFORMATION

Each year, in the United States, health care insurers process over 5 billion claims for payment. For Medicare and other health insurance programs to ensure that these claims are processed in an orderly and consistent manner, standardized coding systems are essential. The HCPCS Level II Code Set is one of the standard code sets used for this purpose. The HCPCS is divided into two principal subsystems, referred to as level I and level II of the HCPCS. Level I of the HCPCS is comprised of CPT® (Current Procedural Terminology), a numeric coding system maintained by the American Medical Association (AMA). The CPT® is a uniform coding system consisting of descriptive terms and identifying codes that are used primarily to identify medical services and procedures furnished by physicians and other health care professionals. These health care professionals use the CPT® to identify services and procedures for which they bill public or private health insurance programs. Decisions regarding the addition, deletion, or revision of CPT® codes are made by the AMA. The CPT® codes are republished and updated annually by the AMA. Level I of the HCPCS, the CPT® codes, does not include codes needed to separately report medical items or services that are regularly billed by suppliers other than physicians.

Level II of the HCPCS is a standardized coding system that is used primarily to identify products, supplies, and services not included in the CPT® codes, such as ambulance services and durable medical equipment, prosthetics, orthotics, and supplies (DMEPOS) when used outside a physician's office. Because Medicare and other insurers cover a variety of services, supplies, and equipment that are not identified by CPT® codes, the level II HCPCS codes were established for submitting claims for these items. The development and use of level II of the HCPCS began in the 1980's. Level II codes are also referred to as alpha-numeric codes because they consist of a single alphabetical letter followed by 4 numeric digits, while CPT® codes are identified using 5 numeric digits.

A. HISTORY

The development and use of Level II of the HCPCS began in the 1980s. Concurrent to the use of Level II codes, there were also Level III codes. HCPCS Level III were developed and used by Medicaid State agencies, Medicare contractors, and private insurers in their specific programs or local areas of jurisdiction. For purposes of Medicare, Level III codes were also referred to as local codes. Local codes were established when an insurer preferred that suppliers use a local code to identify a service, for which there is no Level I or Level II code, rather than using a "miscellaneous or not otherwise classified code."

HIPAA required the Secretary to adopt standards for coding systems that are used for reporting health care transactions. Thus, regulations were published in the Federal Register on

August 17, 2000 (65 FR 50312), to implement standardized coding systems under HIPAA. These regulations provided for the elimination of Level III local codes by October 2002, at which time, the Level I and Level II code sets could be used. The elimination of local codes was postponed, as a result of section 532(a) of BIPA, which continued the use of local codes through December 31, 2003.

The regulation that was published on August 17, 2000 (45 CFR 162.1002), to implement the HIPAA requirement for standardized coding systems established the HCPCS Level II codes as the standardized coding system for describing and identifying health care equipment and supplies in health care transactions that are not within the CPT® code set jurisdiction. The HCPCS Level II coding system was selected as the standardized coding system because of its wide acceptance among both public and private insurers.

B. AUTHORITY

The Secretary of the Department of Health and Human Services has delegated authority under the Health Insurance Portability and Accountability Act of 1996 (HIPAA) to the AMA and CMS to maintain and distribute HCPCS Level I and Level II codes, respectively.

C. HCPCS LEVEL II CODES

The HCPCS Level II coding system is a comprehensive, standardized system that classifies similar products that are medical in nature into categories for the purpose of efficient claims processing. For each alpha-numeric HCPCS code, there is descriptive terminology that identifies a category of like items. These codes are used primarily for billing purposes. For example, suppliers use HCPCS Level II codes to identify items on claim forms that are being billed to a private or public health insurer. Currently, there are national HCPCS codes representing almost 8,000 separate categories of like items or services that encompass products from different manufacturers. When submitting claims, suppliers are required to use one of these codes to identify the items they are billing.

HCPCS is a system for identifying items and certain services. It is not a methodology or system for making coverage or payment determinations, and the existence of a code does not, of itself, determine coverage or non-coverage for an item or service. While these codes are used for billing purposes, decisions regarding the addition, deletion, or revision of HCPCS codes are made independent of the process for making determinations regarding coverage and payment.

With regard to the Medicare program, if specific Medicare coverage or payment indicators or values have not been established for any new HCPCS codes, this may be because a national Medicare coverage determination and/or fee schedule amounts have not yet been established for these items. This is neither an indicator of Medicare coverage or non-coverage. In these cases, until national Medicare coverage and payment guidelines have been established for these codes, the Medicare coverage and payment determinations for these items may be made based on the discretion of the Medicare contractors processing claims for these items.

CMS includes parenthetical coding guidelines for several codes throughout the Tabular List, which are effective for 2025. Some of these guidelines include deleted CPT® or HCPCS Level II codes, even though the guidelines were from the latest updates from CMS for 2025. Please check the CMS website for further updates or guideline changes.

Generic and brand-name drugs found throughout the Tabular List are from the latest CMS updates. Please check the CMS website and the FDA website for further information on valid or discontinued drugs.

TRANSPORTATION SERVICES INCLUDING AMBULANCE (A0021-A0999)

HCPCS Level II codes for ambulance services (A0021-A0999) must be reported with modifiers indicating pick-up origins and destinations. The modifier describing the arrangement (QM, QN) is listed first. The modifiers describing the origin and destination are listed second. Origin and destination modifiers are created by combining two alpha characters from the following list. Each alpha character, with the exception of X, represents either an origin or destination. Each pair of the alpha characters creates one modifier. The first position represents the origin and the second the destination. The modifiers most commonly used are:

D	Diagnostic or therapeutic site other than P or H when these are used as origin codes
E	Residential, domiciliary, custodial facility (other than 1819 facility)
G	Hospital-based dialysis facility
H	Hospital
I	Site of transfer (e.g., airport or helicopter pad) between modes of ambulance transport
J	Free standing ESRD facility
N	Skilled nursing facility (SNF)
P	Physician's office
R	Residence
S	Scene of accident or acute event
X	Intermediate stop at physician's office on way to hospital (destination code only)

Appendix A

Table of Drugs and Biologicals

Generic and brand-name drugs found throughout the Table of Drugs and Biologicals are a representative sample of drugs and biologicals commonly associated with HCPCS Level II codes. Please check the CMS and FDA websites for the most up-to-date information on coverage, active brand names, and validity of drugs.

Caution: Never code directly from the Table of Drugs and Biologicals. Always cross-reference the code to the Tabular List before final code assignment. Questions regarding coding and billing guidance should be submitted to the insurer in whose jurisdiction a claim would be filed. For private sector health insurance systems, please contact the individual private insurance entity. For Medicaid systems, please contact the Medicaid agency in the state in which the claim is being filed. For Medicare, contact the Medicare contractor.

Abbreviations used in the Table of Drugs and Biologicals

IA - Intra-arterial administration

IT - Intrathecal

VAR - Various routes of administration

IV - Intravenous administration

SC - Subcutaneous administration

OTH - Other routes of administration

IM - Intramuscular administration

INH - Administration by inhaled solution

ORAL - Administered orally

Intravenous administration includes all methods, such as gravity infusion, injections, and timed pushes into blood vessels, usually veins. IM refers to injections into muscles; IT to injections into the spinal column; and SC to injections into tissues (not muscle) under the skin. VAR denotes various routes of administration and is used for drugs that are commonly administered into joints, cavities, tissues, or topical applications, in addition to other parenteral administrations. OTH indicates other administration methods, such as intraocular injections, suppositories, or catheter injections.

Drug Name	Unit Per	Route	Code

Mod	Modifier Description, Definition, Explanation, and Tips
BR	<p>The beneficiary has been informed of the purchase and rental options and has elected to rent the item</p> <p>Definition: Append modifier BR to a code for durable medical equipment, or DME, items where the provider informs the beneficiary of the differences between purchasing and renting of the DME item and the beneficiary chooses to rent the item.</p> <p>Explanation: Modifier BR identifies a code as an item where the beneficiary chooses to rent the item after the provider fully informs the recipient at the time the patient receives the item of the purchase and rental options available. A provider appends this modifier for durable medical equipment, or DME, items such as parenteral and enteral, or PEN pumps and electric wheelchairs, reportable with HCPCS K0835 through K0891.</p> <p>Tips: Medicare discontinued the use of the following modifiers on claims for most capped rental items outside of those identified above: BP, The beneficiary has been informed of the purchase and rental options and has elected to purchase the item, modifier BR, and modifier BU, The beneficiary has been informed of the purchase and rental options and after 30 days has not informed the supplier of his/her decision. This change was due to the implementation of Section 5101 of the Deficit Reduction Act of 2005.</p>
BU	<p>The beneficiary has been informed of the purchase and rental options and after 30 days has not informed the supplier of his/her decision</p> <p>Definition: Append modifier BU to a code for durable medical equipment, or DME, items where the provider informs the beneficiary of the differences between purchasing and renting the item and after 30 days the beneficiary has not informed the supplier of his decision.</p> <p>Explanation: Modifier BU identifies a code for a durable medical equipment, or DME, item that a provider fully informs the recipient at the time the patient receives the item of the purchase and rental options available but the beneficiary does not inform the supplier of his decision to rent or purchase the item for 30 days or more.</p> <p>A provider appends this modifier for certain durable medical equipment, or DME, items such as parenteral and enteral, or PEN, pumps and electric wheelchairs regardless of the date of the first rental period, reportable with HCPCS K0835 thru K0891, and on all capped rental items where the first rental period began prior to January 1, 2006.</p> <p>Tips: Medicare discontinued the use of the following modifiers on claims for most capped rental items outside of those identified above: BP, The beneficiary has been informed of the purchase and rental options and has elected to purchase the item, modifier BR, and modifier BU, The beneficiary has been informed of the purchase and rental options and after 30 days has not informed the supplier of his/her decision. This change was due to the implementation of Section 5101 of the Deficit Reduction Act of 2005.</p>
CA	<p>Procedure payable only in the inpatient setting when performed emergently on an outpatient who expires prior to admission</p> <p>Definition: Append modifier CA when the patient is an outpatient, in an inpatient setting, and the patient passes away without being admitted as an inpatient.</p> <p>Explanation: In order to receive payment for the CA modifier with a Healthcare Common Procedure Coding System, or HCPCS code, the patient should be an emergency patient and must be an outpatient, the setting should be an inpatient setting only, and the patient passes away without being admitted as an inpatient.</p> <p>For outpatients who receive inpatient only procedures on an emergency basis and who expire before inpatient admittance to the hospital, the provider receives a specific outpatient Ambulatory Payment Classification, or APC payment as reimbursement for all the services on that day. The assignment of a modifier CA on an inpatient only procedure line identifies the service as such and assigns the specific payment, and turns on a packaging flag for all other line items on that claim with that date of service. Payment is only permissible for one procedure with a modifier of CA.</p> <p>Tips: Do not use modifier CA on more than one procedure on a claim. If a provider submits multiple inpatient only procedures with the modifier CA, the payer returns the claim back to the provider. If a provider applies a modifier CA on an inpatient only procedure code for a patient who did not expire, and the patient discharge status code is not 20, Expired, then the provider will also get the claim back.</p>
CB	<p>Service ordered by a renal dialysis facility (RDF) physician as part of the ESRD beneficiary's dialysis benefit, is not part of the composite rate, and is separately reimbursable</p> <p>Definition: A provider appends modifier CB to identify services ordered by a renal dialysis facility, or RDF, provider as part of the dialysis benefit of an end stage renal disease, or ESRD patient. This is not a part of the composite rate payment, and is separately reimbursable.</p> <p>Explanation: A provider appends modifier CB to services related to an ESRD patient's dialysis treatment and ordered by the dialysis facility physician. The test is not a part of the dialysis facility's composite rate payment, and is separately reimbursable. These services may include chest X-rays and other X-rays presumptively considered to be dialysis related and, therefore, appropriate for submission with the CB modifier; along with lab tests such as certain panel tests, urinalysis, and specific electrocardiogram, or ECG, tests and some vascular studies.</p> <p>Tips: Modifier CB affects consolidated billing rules for skilled nursing facilities for inpatients.</p> <p>Append modifier CB, only after determining that the patient has ESRD entitlement, he is undergoing the test for dialysis treatment for ESRD, the test is an order of the dialysis facility, the test is not a part of the composite rate, and is separately reimbursable. The patient should be in a Medicare Part A stay, Bill 21X or 22X.</p>

100-1, Chapter-1, 10.1

Hospital Insurance (Part A) for Inpatient Hospital, Hospice, Home Health and Skilled Nursing Facility (SNF) Services - A Brief Description

Hospital insurance is designed to help patients defray the expenses incurred by hospitalization and related care. In addition to inpatient hospital benefits, hospital insurance covers post hospital extended care in SNFs and post hospital care furnished by a home health agency in the patient's home. Blood clotting factors, for hemophilia patients competent to use such factors to control bleeding without medical or other supervision, and items related to the administration of such factors, are also a Part A benefit for beneficiaries in a covered Part A stay. The purpose of these additional benefits is to provide continued treatment after hospitalization and to encourage the appropriate use of more economical alternatives to inpatient hospital care. Program payments for services rendered to beneficiaries by providers (i.e., hospitals, SNFs, and home health agencies) are generally made to the provider. In each benefit period, payment may be made for up to 90 inpatient hospital days, and 100 days of post hospital extended care services.

Hospices also provide Part A hospital insurance services such as short-term inpatient care. In order to be eligible to elect hospice care under Medicare, an individual must be entitled to Part A of Medicare and be certified as being terminally ill. An individual is considered to be terminally ill if the individual has a medical prognosis that his or her life expectancy is 6 months or less if the illness runs its normal course.

The Part A benefit categories of inpatient hospital services and SNF services are each subject to separate and mutually exclusive day limits, so that the use of benefit days under one of these benefits does not affect the number of benefit days that remain available under the other. Accordingly, the 90 days of inpatient hospital benefits (plus 60 nonrenewable lifetime reserve days -- see Pub. 100-02, Medicare Benefit Policy Manual, chapter 5) that are available to a beneficiary in a hospital do not count against the 100 days of post hospital extended care benefits that are available in a SNF, and vice-versa.

100-1, Chapter-3, 20.5

Blood Deductibles (Part A and Part B)

Program payment may not be made for the first 3 pints of whole blood or equivalent units of packed red cells received under Part A and Part B combined in a calendar year. However, blood processing (e.g., administration, storage) is not subject to the deductible.

The blood deductibles are in addition to any other applicable deductible and coinsurance amounts for which the patient is responsible.

The deductible applies only to the first 3 pints of blood furnished in a calendar year, even if more than one provider furnished blood.

100-1, Chapter-3, 20.5.2

Part B Blood Deductible

Blood is furnished on an outpatient basis or is subject to the Part B blood deductible and is counted toward the combined limit. It should be noted that payment for blood may be made to the hospital under Part B only for blood furnished in an outpatient setting. Blood is not covered for inpatient Part B services.

100-1, Chapter-3, 20.5.3

Items Subject to Blood Deductibles

The blood deductibles apply only to whole blood and packed red cells. The term whole blood means human blood from which none of the liquid or cellular components have been removed. Where packed red cells are furnished, a unit of packed red cells is considered equivalent to a pint of whole blood. Other components of blood such as platelets, fibrinogen, plasma, gamma globulin, and serum albumin are not subject to the blood deductible. However, these components of blood are covered as biological.

Refer to Pub. 100-04, Medicare Claims Processing Manual, chapter 4, §231 regarding billing for blood and blood products under the Hospital Outpatient Prospective Payment System (OPPS).

100-1, Chapter-3, 30

Outpatient Mental Health Treatment Limitation

Regardless of the actual expenses a beneficiary incurs in connection with the treatment of mental, psychoneurotic, and personality disorders while the beneficiary is not an inpatient of a hospital at the time such expenses are incurred, the amount of those expenses that may be recognized for Part B deductible and payment purposes is limited to 62.5 percent of the Medicare approved amount for those services. The limitation is called the outpatient mental health treatment limitation (the limitation). The 62.5 percent limitation has been in place since the inception of the Medicare Part B program and it will remain effective at this percentage amount until January 1, 2010. However, effective January 1, 2010, through January 1, 2014, the limitation will be phased out as follows:

- January 1, 2010 –December 31, 2011, the limitation percentage is 68.75%.
(Medicare pays 55% and the patient pays 45%).
- January 1, 2012 –December 31, 2012, the limitation percentage is 75%.
(Medicare pays 60% and the patient pays 40%).
- January 1, 2013 –December 31, 2013, the limitation percentage is 81.25%.
(Medicare pays 65% and the patient pays 35%).
- January 1, 2014 –onward, the limitation percentage is 100%.
(Medicare pays 80% and the patient pays 20%).

For additional details concerning the outpatient mental health treatment limitation, please see the Medicare Claims Processing Manual, Publication 100-04, chapter 9, section 60 and chapter 12, section 210.

Thank you for your contribution to the Hardship Fund.

Thanks to your book purchase, AAPC will be able to help more members who face financial difficulty.

The AAPCCA Hardship Fund is a financial aid program created to assist our members with:

- ✓ **Maintaining their membership and certification through membership renewal dues, exam prep tools and more**
- ✓ **Registration for national or regional conferences**
- ✓ **Certain local chapter events**

A portion of each book sale goes to helping applicants through their time of need. All awards are based on the availability of funds and the applicant's ability to demonstrate reasonable hardship. We appreciate your contribution and your support for your fellow AAPC members.

To learn more about the Hardship Fund and its efforts or apply for financial assistance, **visit aapc.com**.
